The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). A laboratory grown diamond is one that has been synthesized chemically, physically or biologically. IGI is a member of the International Gemological Union (IGU) and is a member of the International Laboratory for Gemmology and Gemmological Research (ILGG). IGI employs and utilizes those techniques and equipment (currently available to IGI) including, without limitation, 10X magnification, corrected light table, binocular microscope, master color comparison stones, non-contact optical instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.
